

WIKIAlps Transnational working table

19 marzo 2014

The Alpine Space project WIKIAlps aims at contributing to a balanced and shared territorial development in the Alpine Space by overcoming national borders. Sound decision making in spatial development requires appropriate, manageable and current information and WIKIAlps delivers the tools needed. These tools - the WIKIAlps wiki, guidelines and recommendations - are tailored to the needs of decision makers, civil servants, researchers and entrepreneurs, providing them with operative information ready-to-use for policy design in spatial development.

The WIKIAlps project has started in October 2013 and will develop results until December 2014. It is co-financed by the European Regional Development Fund in the frame of the European Territorial Cooperation Programme Alpine Space, as well as by national funding bodies.

In March/April 2014 two transnational working tables will bring observers, stakeholders and partners from all over the Alpine Space together in order to learn from their experiences, identify needs in spatial development and help you to implement synergies at the transnational level.

Tipo di evento Workshop / seminario

Luogo: Innsbruck / AT
