

# Spletna enciklopedija WIKIAlps – novo orodje za skladen prostorski razvoj Alp

## Osnovni podatki

Datum objave: 16. april 2014  
Avtor: [dr. Janez Nared](#)

## Opis

### Spletna enciklopedija WIKIAlps – novo orodje za skladen prostorski razvoj Alp

Mednarodna delavnica o priložnostih, ki jih prinašajo projekti Programa Območje Alp

Program Evropske unije Območje Alp spodbuja raziskovalne in aplikativne projekte na temo konkurenčnosti, dostopnosti in varstva okolja na območju Alp. V letih 2007–2013 je program za ciljno usmerjene projekte namenil 130 milijonov evrov, nadaljnjih 150 milijonov evrov pa je za to namenjeno v naslednjih sedmih letih. Ključni izziv pri tem je, kako iz vloženega denarja iztržiti največ in kako rezultate približati potrebam pomembnejših deležnikov. Da bi izboljšali rezultate projektov, organiziramo partnerji projekta WIKIAlps mednarodno delavnico, ki bo **6. maja** v Innsbrucku. Njen namen bo opredeliti priložnosti, ki jih alpskim deležnikom prinašajo rezultati projektov Programa Območje Alp ter kakšni so izzivi in potrebe za prihodnji razvoj alpskega prostora.

Udeleženci bodo dobili boljši vpogled v spletno enciklopedijo WIKIAlps, ki omogoča vpogled v rezultate projektov iz dveh tematskih področij: Vključujoča rast ter Učinkovita raba virov in upravljanje ekosistemov. Spletna enciklopedija WIKIAlps ponuja izbrane rezultate projektov, kot so podatkovne baze, priporočila in smernice politikam v uporabniku prijazni obliki ter s tem po mnenju vodje projekta na Znanstvenoraziskovalnem centru Slovenske akademije znanosti in umetnosti, dr. Janeza Nareda, pomaga javnim uslužbencem, uradnikom, raziskovalcem, podjetnikom in zainteresirani javnosti pri oblikovanju trajnostnih prostorskih politik.

Razprava med udeleženci bo spletni enciklopediji WIKIAlps v pomoč pri oblikovanju za uporabnike relevantnih informacij, da jih bodo lahko le-ti čim učinkoviteje uporabljali pri svojem delu. Udeleženci bodo imeli priložnost za druženje s številnimi deležniki iz alpskih držav ter tako priložnosti za krepitev sodelovanja, sinergij in navezovanje novih stikov. Na delavnici, ki bo potekala v Innsbrucku, v "Haus der Begegnung", bodo zlasti prisotni deležniki iz vzhodnega dela Alp, seveda pa so k udeležbi vabljeni tudi ostali. Podobna delavnica, namenjena deležnikom iz zahodnega dela Alp, bo potekala 28. maja v Courmayeurju. Za več informacij in registracijo obiščite [www.wikialps-project.eu](http://www.wikialps-project.eu). Projekt WIKIAlps prek programa Transnacionalnega sodelovanja Območje Alp sofinancira Evropski sklad za regionalni razvoj.

## Vabljeni

### European Vegetation Survey

8. 5. 2014 ob 0:00 • Research Centre of the Slovenian Academy of Sciences and Arts (Ljubljana, Slovenia)

## WIKIAlps a new tool for spatial development in the Alps

### Basic information

**Published on:** 16. April 2014  
**Author:** [Janez Nared, Ph. D.](#)

### Description

#### WIKIAlps a new tool for spatial development in the Alps

Transnational working tables on how to benefit from Alpine Space project results

The European Union's Alpine Space Programme is actively involved in promoting research and operational projects on competitiveness, accessibility, and environmental protection of the Alpine space. During the period 2007-2013, the programme has invested 130 Mio € in impact-oriented projects and additional 150 Mio € have been planned for the upcoming six-year programming period.

To ensure a lasting contribution of such considerable monetary efforts, the current challenge researchers are facing, is how to link project results with the needs of major stakeholders in the Alps.

In order to improve the use of project results, the partner institutions working at the WIKIAlps project organise a "Transnational Working Table" on 06 May 2014 in Innsbruck. Aim of the different sections will be to discuss with stakeholders to what extent they have benefited from Alpine Space project results and what their expectations, concerns and needs are about future spatial development in the Alps. Participants will gain more insights into WIKIAlps, an innovative wikipedia like online platform developed in the framework of the project, which enables easy access to Alpine Space project results on two thematic fields: inclusive growth and resource efficiency and ecosystem management. "WIKIAlps reorganises selected projects' results such as data, recommendations, and guidelines in a user friendly format, which gives civil servants, public administrations, researchers, entrepreneurs and interested public operative tools to elaborate and learn more about spatial development policy design" - says project leader Caroline Pecher of the European Academy of Bozen/Bolzano (EURAC).

A discussion round among participants will collect feedbacks on how to shape the information contained in WIKIAlps to meet transnational common issues and needs of stakeholders whose daily work influences spatial development in the Alps. Participants will also have the opportunity to discuss with a wide range of stakeholders interested in extending transnational cooperation and synergies within the Alpine space. At the Innsbruck meeting, hosted at the "Haus der Begegnung" will mainly participate stakeholders from the Eastern part of the Alps, however the participation is open to participants from the entire Alpine space. An additional "Transnational working table" for stakeholders of the Western part of the Alps will take place in Courmayeur on 28 May 2014 at the "Jardin de

### Invited to attend

#### European Vegetation Survey

8. 5. 2014 at 0:00 • Research Centre of the Slovenian Academy of Sciences and Arts (Ljubljana, Slovenia)
